

### **APPLICATIONS**

- Irrigation management
- Water conservation

### **SPECIFICATIONS**

Technology	Capacitance (FDR)
Range	0-100% where 0%=open air, and 100%=pure water
Resolution	16bit A/D
Interface	RS-485
Connector	Switchcraft EN3C4M (4 pin male)
Cable	13ft of rugged subsurface polyurethane (UV stabilised) communications cable.

### **DESCRIPTION**

The AquaSpy Probe is an advanced soil moisture monitoring device that saves water and enhances water use efficiency. Available in 20", 40" and 60" lengths, with a sensor at every 4" depth, and as sub-surface or 'above ground' variants.

### **DIFFERENTIATORS**

- Robust: latest version of the industry-proven C-probe technology
- Low cost per sensor
- Digital RS-485 interface eliminates negative influences of cabling and connectors
- Watertight, locking connector
