

APPLICATIONS

- Essential for all weather stations
- Micro-climate mapping
- Growing degree days
- Frost alerting
- Mildew and Botrytis indices

DESCRIPTION

The NTC type temperature sensor is specially designed to work with the 12-bit AD converters used in RM200 base station and RS200 nodes to provide highly accurate temperature measurement. The stainless steel tip provides excellent protection and fast temperature transfer.

SPECIFICATIONS

Range	-25 to +100 Celcius -13 to +212 Fahrenheit
Accuracy	+/- 0.1 C
Probe	Stainless steel, 1/4" x 2"
Connector	Conxall/Switchcraft Micro-Con 3pin male
Cable	10 ft of Alpha Wire XTRA- GUARD 3 (extreme outdoor performance, direct burial rated)

DIFFERENTIATORS

- Highly accurate NTC combined with 12 bit A/D converter provide 0.1C overall accuracy
- Compatible with any analogue port on RM200 and RS200
- Extreme-duty cabling
- Watertight, locking connector
